Subject: SCOTH Inquiry Concerning Use Of Ammonium Compounds
In The U.K.

Please find attached a few thoughts concerning possible approaches the TMA could take in representing the industry in responding to SCOTH's letter regarding ammonium compounds.

In addition to my suggestions, Rick Solana is drafting a couple of paragraphs explaining the functions of ammonium compounds in the manufacture of tobacco products as well as a few paragraphs responding to the claim that ammonium compounds influence nicotine behavior (a claim made by Dr. David Kessler in the U.S.). Rick will circulate his draft when it is complete.
